Konkani

## EXPERIENCE

**CAD Engineer, Deccan Fine Chemicals, Goa**

May 2020- Jun 2022

**CAD Engineer Trainee, 5D Engineering Services, Goa**

July 2019 - April 2020

## PROJECTS

**Flight deal finder**

- With the help of python have written a code to search for cheap flights on kiwi site when the flight is the cheapest for duration of 6 months.
- Used Rest API to interact with kiwi partners.
- Used exception handling to handle errors for non-direct flights. which aroused
- Used smtp library to send notification, when the flight is at the cheapest.

**Automated data entry job for apartment listing**

- Use BeautifulSoup/Requests to scrape all the listings from the Zillow web address and stored required information in the form of list
- Using selenium automated the Google form filling procedure to collect the listing price, address, link and store it as a response .
- Once all the responses are completed used selenium to auto fill the Google sheet with all the listing information required for the clients.

**Virtual Bookshelf using Flask framework**

- Created Database using flask_sqlalchemy package to store the titleof the book, author and the rating for the book .
- Used CRUD operations with SQLAlchemy for editing the rating of the book, adding new book to library and deleting a book from the library.
- Displayed all the available books in the library on the home page.

## ACHIEVEMENTS

Secured 1st Place in Futsal Intercollege event
